

# January 2025

**Fiber Installation:** You may have noticed a crew working around town and boring trenches through right of ways or working on the utility poles. Ziplly is currently installing fiber throughout town. This work should take a couple of months to complete.

**Please clean up after your dogs:** We have noticed many of our furry friends getting out for exercise. We love to see that! Did you know we have pet clean up stations at the parks and trailheads to make it easy to keep our public spaces clean? Please utilize the bags and trash cans to clean up after your dog does its daily business. Thank you!

**After Hours Maintenance Help:** If you have an emergency with a city utility, such as your water or sewer service, please call **208-285-1622** to be connected with the on-call maintenance personnel. If it is a question regarding billing or how to set up or change services, please call City Hall at 208-285-1621 during normal business hours.

**Well 9 Update:** The well drillers struck water at about 500' in the Wanapum aquifer several weeks ago. This is the upper aquifer that we have historically tapped into. They are going to continue to drill until we reach the Grande Ronde aquifer, which is the same one we tapped into for Well 8. We expect to hit water at around 900'. Drilling should start up again within the next few weeks.

**Did You Know?** The City has a website. Go to [www.cityofgeneseec.com](http://www.cityofgeneseec.com) for access to online bill pay, building permit applications, employment applications, RV Park reservations, and information on events and clubs within the City. We frequently update it with new information.
